De-oiling valves and instrumentation

DELIVERY REGION

Middle East

PERIOD

2020

Flanged flowmeter with transmitter secured in a shipping crate.

KEY PARAMETERS

43 components in the main lot

6 spare safety valves

Dispatch of process components

Supply of valves and instrumentation for condensate de-oiling. Pneumatically actuated ball valves in carbon steel and stainless steel were complemented by measuring instruments. The main shipping lot contained 43 components, with six spare safety valves in a separate shipment.

SCOPE OF WORK

- Pneumatically actuated shut-off ball valves
- Carbon steel and stainless steel versions
- Spare safety valves

EMKO project portfolio. Supplier at the time of delivery: MIS GROUP s.r.o.
