Condensate measurement upgrade

PROJECT LOCATION

Czechia

PERIOD

Documentation: 2025

Original metering line documented before replacement of the orifice measurement.

KEY PARAMETERS

Level measurement

Mass flow measurement

Measurement upgrade

The completed scope covered condensate level measurement and replacement of orifice-based measurement with a mass flowmeter. The photograph documents the original metering line before modification.

SCOPE OF WORK

- Condensate level measurement
- Replacement of orifice-based measurement with a mass flowmeter

EMKO project portfolio.
