Pneumatically actuated valves for gas processing

EXPORT PROJECT REGION

Middle East

PERIOD

2020-2022

Valve with a pneumatic actuator and control panel during supply preparation.

KEY PARAMETERS

150 assemblies in the technical project scope

111 assemblies in documented completed stages

39 assemblies in a separate final stage

Indicative financial band

EUR 500,000-1 million

Two documented invoiced stages: 111 assemblies and accessories.; excluding VAT (export invoices at 0% VAT)

Staged valve and actuator supplies

The project comprises 150 recorded on/off, shutdown and blowdown valve assemblies in a range of materials and pressure classes. Its documentation links valves, actuators, controls, functional testing and staged dispatch for an export project in the Middle East.

SCOPE OF WORK

- 150 assemblies in the technical scope; documented completed stages: 36 + 75
- Valves from 1″ to 32″, pressure classes 150, 300, 600, 900 and 1500
- Pneumatic actuators, controls, functional tests and export packing
- The final 39 assemblies form a separately recorded stage

Historical project portfolio; the documented invoiced stages were supplied by EMKO HOLDING s.r.o., company ID 04624688. MIS EUROPE s.r.o. also appears in dispatch records.
