Fluidised-bed boiler relocation feasibility study

SCOPE

Feasibility study

PERIOD

Documentation 2026

Existing boiler equipment documented for the relocation feasibility study.

KEY PARAMETERS

Feasibility study

Existing fluidised-bed boiler

Project 1192

Feasibility study

The study considered the feasibility of relocating an existing fluidised-bed boiler. It used documentation of the existing energy facility and its equipment. This reference covers the study; the photographs show the original equipment before any potential relocation.

SCOPE OF WORK

- Feasibility study for fluidised-bed boiler relocation
- Documentation of the existing energy facility
- Definition of the proposed relocation of existing equipment

EMKO project portfolio.
